PROFESSIONAL SUMMARY

15+ years of experience building scalable systems and leading engineering teams. Specialized in Java Full Stack development, cloud architecture, and modern AI engineering workflows (Generative AI, building RAG systems, and Model Context Protocol). Proven track record of leveraging developer tools like GitHub Copilot to boost team productivity, spearheading cloud adoption, and mentoring teams to drive technical excellence.

SKILLS

AI Engineering: Generative AI & RAG, GitHub Copilot, Model Context Protocol (MCP)

Backend & Architecture: Java Full Stack Development, Spring Boot, Hibernate, System Design, Database Design, Snowflake

Cloud & DevOps: AWS, Cloud Architecture, DevOps, CI/CD Pipelines, Git/GitHub

Frontend & Observability: Angular, Splunk, Grafana, JIRA

WORK EXPERIENCE

Vice President — *Morgan Stanley*

10/2021 – Present

Leading the architecture of mission-critical systems and integrating modern AI capabilities (RAG, Model Context Protocol) to improve developer workflows and system capabilities. Spearheaded the enterprise adoption of AI coding assistants (GitHub Copilot), driving significant productivity gains. Mentoring engineering teams and driving technical excellence across projects.

- Spearheaded the enterprise-wide rollout of GitHub Copilot, training 50+ developers and improving coding speed by 35% through AI-assisted development.
- Architected and built internal RAG (Retrieval-Augmented Generation) systems utilizing Model Context Protocol (MCP) to connect enterprise knowledge bases to LLM assistants, reducing information discovery time by 50%.
- Successfully migrated legacy systems to modern cloud architecture, resulting in 40% improved performance.
- Established robust CI/CD pipelines and DevOps practices, reducing deployment time by 60%.
- **Key Focus:** Generative AI & RAG, GitHub Copilot, Model Context Protocol (MCP), Cloud Architecture.

Served as the technical lead for investment banking solutions, focusing on high-performance trading systems and real-time data processing. Managed critical production environments and led system optimization initiatives.

- Reduced system response time by **35%** through architectural improvements and optimized database queries.
- Implemented automated monitoring solutions that decreased incident resolution time by **50%**.
- **Key Focus:** Performance Optimization, Production Support, Banking Systems.

Module Lead — *Mindtree Limited*

11/2010 – 12/2016

Orchestrated the development of enterprise software modules and established code quality standards. Led a team of developers in delivering robust solutions while ensuring best practices in software development.

- Implemented automated testing framework that increased code coverage to **85%**.
- Reduced defect rate by **40%** through improved code review processes.
- **Key Focus:** Technical Leadership, Code Quality, Process Improvement.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

AWS Certified Cloud Practitioner

KEY PROJECTS

Executive Services*Duration: 72 months*

Platform aimed at C-suite executives to manage and diversify portfolios and executive-level services. Built scalable backend modules and integrations to support executive workflows and reporting.

AirFare Shop*Duration: 50 months*

Itinerary construction and pricing service delivering flexible priced itineraries and lowest-fare calendar offers. Handled shopping and inventory modules with in-memory flight caches for low-latency access, supported multiple point-of-sale configurations, and processed mainframe updates over MQ and Tuxedo.
