PROFESSIONAL SUMMARY

15+ years of experience building scalable systems and leading engineering teams. Specialized in Java Full Stack development, cloud architecture, and technical leadership. Proven track record of spearheading cloud adoption, enhancing system observability, and mentoring teams to drive technical excellence.

SKILLS

Java Full Stack Development

Generative AI

Cloud Technologies

Cloud Architecture

System Design

Database Design

Spring Boot

Hibernate

Angular

DevOps & CI/CD

Splunk

Grafana

JIRA

Git/GitHub

WORK EXPERIENCE

Vice President — Morgan Stanley

10/2021 – Present

Leading the architecture and development of mission-critical systems with a focus on scalability and resilience. Spearheaded the adoption of cloud-native patterns and enhanced system observability through Splunk and Grafana implementation. Mentoring engineering teams and driving technical excellence across projects.

- Successfully migrated legacy systems to modern cloud architecture, resulting in 40% improved performance.
- Established robust CI/CD pipelines and DevOps practices, reducing deployment time by 60%.
- **Key Focus:** Cloud Architecture, Team Leadership, System Design.

Specialist — Synechron Technologies

12/2016 – 10/2021

Served as the technical lead for investment banking solutions, focusing on high-performance trading systems and real-time data processing. Managed critical production environments and led system

optimization initiatives.

- Reduced system response time by 35% through architectural improvements and optimized database queries.
- Implemented automated monitoring solutions that decreased incident resolution time by 50%.
- **Key Focus:** Performance Optimization, Production Support, Banking Systems.

Module Lead — *Mindtree Limited*

11/2010 – 12/2016

Orchestrated the development of enterprise software modules and established code quality standards. Led a team of developers in delivering robust solutions while ensuring best practices in software development.

- Implemented automated testing framework that increased code coverage to 85%.
- Reduced defect rate by 40% through improved code review processes.
- **Key Focus:** Technical Leadership, Code Quality, Process Improvement.

CERTIFICATIONS

AWS Certified Cloud Practitioner

KEY PROJECTS

Executive Services

Duration: 72 months

Platform aimed at C-suite executives to manage and diversify portfolios and executive-level services. Built scalable backend modules and integrations to support executive workflows and reporting.

AirFare Shop

Duration: 50 months

Itinerary construction and pricing service delivering flexible priced itineraries and lowest-fare calendar offers. Handled shopping and inventory modules with in-memory flight caches for low-latency access, supported multiple point-of-sale configurations, and processed mainframe updates over MQ and Tuxedo.
